

Join us at the 1st ISLANDS WATER CONGRESS in the Faroe Islands

4th - 6th September 2024
Tórshavn, Faroe Islands

FRESHWATER AND ISLANDS: ADMINISTRATION, COLLABORATION, AND INNOVATION

The International Water Resources Association (IWRA), in partnership with the Faroese Geological Survey (Jarðfeingi), will host a high-level congress on Freshwater and Islands in the Faroe Islands from September 4th - 6th, 2024. The congress aims to address water challenges faced by island communities offering tools for specific issues. The event will cater to a global island audience and, notably, small island developing states (SIDS).

It endeavours to transcend the boundaries of a conventional academic gathering, incorporating a policy-oriented approach that will captivate water professionals working in islands, including the younger island generations. Additionally, the congress will celebrate the significance of freshwater within an island context, embracing the realms of arts, culture, and youth engagement.
