

## Do you want to learn about permafrost in Arctic Societies? 😊

We offer the first interdisciplinary and community-oriented master's course: ***Permafrost in Arctic Societies*** (10 ECTS), held at the DTU Arctic campus in Sisimiut in Western Greenland (66 N)!

### Who is it for?

The course is designed for engineering and geoscience master students and offers insights from the permafrost-related disciplines of physical geography, geotechnical engineering and Arctic social sciences. All interested engineering or geoscience students can apply.

### What will you learn?

Students will gain an understanding of thawing permafrost and its effects on Arctic communities, through a combination of fieldwork, lectures, labwork, mapping exercises, and interaction with local stakeholders and communities - blending theory, practice, and project-based learning.

**When:** 15 April to 29 May 2026

**Application deadline:** 1 October for DTU and DTU collaboration university students, 1 November for students external to DTU.
